

Regional and international policies and the biofuels sector development in sub-Saharan Africa

[Contributors: PREBE (West Africa), Eco, UCT- ERC, MU, ISUSI, EUBIA, UEMOA, FAO, WIP, EKMD]

Structure of the report

- 1.0. Introduction**
 - 1.1. Setting the stage: The era of biofuels development
 - 1.2. International and regional trends in biofuels development
 - 1.3. The regional and international demand of biofuels
 - 1.4. The need for international and regional policy review
 - 1.5. Organization of the report
- 2.0. Objectives and study approach**
 - 2.1. Primary objective of the policy review
 - 2.2. Scope of policy review
 - 2.3. Main challenges
 - 2.4. Study limitations
- 3.0. International biofuel policy initiatives**
 - 3.1. History and trends in the US and EU biofuels development
 - 3.2. Policy incentives for biofuel development: a comparative assessment of the EU and US biofuels policies
 - 3.3. The future of biofuels in developing countries: the role of regional economic communities (e.g., SADC, COMESA, EAC, AU/NEPAD, ECOWAS) in promoting biofuel development.
 - 3.4. Do international policies have spill-over effects on African biofuels sector?
 - 3.5. Synergies and/or tradeoffs between international and regional bio-energy policies

4.0. Impact of western biofuel development on Sub-Saharan Africa

4.1. Impact of WTO rules on the development of the biofuels sector in Sub-Saharan Africa

4.2. Poverty impact of bio-energy production on developing countries (e.g., potential impact on food and energy prices)

4.3. Effect of quality control, standards and certification on the bio-energy sector development in Africa

4.4. Future demand for biofuel products in developed countries potential impact on food security in developing countries

5.0 The future and prospects for biofuels sector development

5.1 Mitigating the negative effects: The role of science and technology on the development of bio-energy industry (e.g., bio-technology and technologies for second generation biofuels)

5.2 Harnessing the potential of biofuels in Africa: What changes are needed to facilitate biofuels production and marketing in Africa?

5.3. Incentives for biofuels development in Africa: The role of multinational organizations on biofuels development

5.5 Summary and conclusions

6.0 References
